## Summary

Hey there, I am Mohini Giri passionate learner specifically in the field of AI which is a revolutionized field in this era of technology which makes me curious about our future and development in AI, specifically I want to contribute to the field of AI in the future and want to come up with research in this field I just want an opportunity to learn from right source so that I can be able to discover what I wanted to.

Talking about my skills I am a Python programmer and currently acquiring knowledge of AI. Hence moving towards my learning journey in the subfield called machine learning and gathering skills in the field of AI, also I build webpages using HTML and CSS, and I build projects in each field that I mention on my GitHub account.

A special thing about mine is I have very innovative ideas coming up in my mind and also I am a very curious person which leads me to think and just want to implement my innovative ideas in the real world towards every common people!

My vision about AI is to let anyone on this planet even every common man be able to take advantage of every aspect of AI technology in an affordable way.

That's all about my current journey I will make an update on my skills and experiences.
